## School Lunch

1. At my lunch table $\qquad$ kids drank white milk, twice as many had chocolate milk and half as many had juice as white milk. How many of each did they drink?
2. The kitchen served $\qquad$ slices of pizza. If $\qquad$ were cheese, how many were veggie slices?
3. Students may choose a hamburger, turkey sandwich or quesadilla with carrots, peas or rice. What lunch combinations could students make?
4. Each apple is cut into $\qquad$ apple slices. How many slices would you get from $\qquad$ apples? If each student gets $\qquad$ slices, how many students can they feed?
